Call Volume/ Missed Calls by Year				
2018	495	21		
2019	507	26		
2020	484	12		
2021	598	20		
2022	100	3		

Our call volume remains steady and like I said last month it will continue to slowly build back up and warmer weather and the ability for people to be outside starts to improve. Even though we are not running the volume of calls like we were at the end of last year we are still dealing with high acuity calls, which means that we are dealing with people that are sicker than normal. We have been out in the communities teaching CPR class to Washington Fire and doing a rescue vehicle refresher with Appleton Fire. We do this so that these departments can help us if we need it and so that they know where certain equipment on the rescue so that they can grab it when we request it.
